## Profinet DCP Client User Manual

---

When updating the web application, all Profinet-devices available in the network are recognized.

On the left side of the web application you will now find the recognized devices. Select one of them and you will get more information.

In the next picture you will see the available information about the device. With a click on the IP-address you will be redirected to a configuration page, where you can configure your device.

# Geräteinformationen

Gerätename: Device 1  
Geräte-IP: [192.168.1.2](#)  
Mac: 23:23:23:23:23
